### DEFENSIVE PISTOL DIVISIONS

#### SSP-Stock Service Pistol

This is the division for full size handguns without any modifications. Bolton accessories such as adding an optic, light, or threaded barrel do not count as modifications. Magazine capacity is restricted to flush floor plate mags (Base plate does not protrude more than ¼" below the bottom of the grip) for the start of every stage. Extended mags may be used for reloads.

#### ESP-Enhanced Service Pistol

This is the division for full size handguns with modifications. Modifications include but are not limited to Trigger Work, Grip Work, Slide Work, Aftermarket porting or compensators. . Magazine capacity is restricted to flush floor plate mags (Base plate does not protrude more than ¼" below the bottom of the grip) for the start of every stage. Extended mags may be used for reloads.

#### CCP-Compact Carry Pistol

This division is the same as ESP with the exception that the barrel length may not exceed 4.1" in length.

#### BUG-Back Up Gun

This division is the same as ESP with the exception that the barrel length may not exceed 3.6" in length.

#### CDP-Custom Defensive Pistol

Big Bore division for .45 and 10mm only. All modifications are legal in this division. Mag capacity is limited to 8rds for the start of every stage. Extended/Higher Capacity mags may be used for reloads

#### PCC-Pistol Caliber Carbine

Any non-holster able firearm chambered in common pistol calibers up to 357 mag. This includes carbines, SBR's, and braced "pistols". No restrictions on modifications. Mag capacity is limited to 20rds for the start of every stage. Larger capacity mags may be used for reloads. All PCC shooters will be required to have a chamber flag inserted and carry the firearm with the muzzle up when not on the firing line.
